

Standard Flame Generator

The Flame Generator is used by professional instructors to train personnel in the basics of Fire Safety. For maximum safety the unit is operated by a hand held remote, giving control of the ignition and gas shut-off.

FGFE1201	Flame generator with solenoid valve
Dimensions	1050 x 800 x 220 mm
Weight	25kg
Material	Stainless steel 304-15/10- folded edges
Supply gas	Propane without flow limiter
Regulator	Adjustable output
Solenoid valve supply	Voltage input: 12v
Gas supply hose	Length: 3.00m
Electric Boxes	According to IP 65
Battery	NICD 12V
Ignition	Piezoelectric with detachable remote control
Battery charger	Supply: 230v / voltage output: 12v
Tray	Stainless steel 21mm
Advised extinguishing agents	Water, Carbon Dioxide, Water Additive, Powder
Option	Flame Detection
