

Fire Training Manikin

This is a specially designed Manikin that allows repeated training with 'real fire', by means of a flammable paste. Internal filling and external "skin" are carefully manufactured from selected top-of-the-line materials. During training sessions, this manikin is used with a fire blanket or an extinguisher. It allows the trainees to acquire good knowledge and skills to react in case of burning victims.

FMAE1825	Fire fighting training manikin
Weight	25kg
Height	Approx. 180cm / 6'
Lifetime	More than 1000 ignitions
Heat Resistance	~ 600 c
Ignition	Flammable Paste
Extinction	Fire blanket or Extinguisher
Options	Stand-allowing the manikin to stand at full height
