

Multi - Rig

Our Multi-Rig has been designed and developed to give a compact, comprehensive and cost effective training facility. Fabricated from steel containers, this unit can be designed to suit the individual and regional requirements of the emergency services, this in turn meeting the legislation training qualifications. The Multi-Rig can be purchased in stages or as a whole, with additional containers added if necessary.

The Multi-Rig can provide the following training scenario's:

- *Flash-over and back-draught training*
- *PPV training both offensive and defensive*
- *Search and rescue*
- *Protected staircase and high rise simulation*
- *Large and small domestic incidents*
- *Large and small commercial and industrial incidents*
- *Garage fires*
- *Rolgis (line rescue) and confined space simulator*
- *Basement and flooding facility*
- *Ladder pitch to various windows and balcony rescue*
- *Roof ladder facility*
- *Capacity to simulate ICS at larger scale incidents EFSM2 for ADO & do group and eight pump exercise for strategic ICS.*
- *Capacity to carryout exercises and assessments to WM7.2 for crew and watch managers*
- *Capacity for income generation from police for fire arms training, dog handling, bomb squad, chemical warfare, USAR and other emergency services.*
